HÄUSER

The international magazine for architecture, design, art, garden and travel

No other magazine offers so many house reports with opulent picture series and with knowledgeable texts. In each issue, HÄUSER focuses on topics such as "conversion", "living in the country" or "villas", complemented by other domiciles that show the entire spectrum of sophisticated residential architecture. HÄUSER also provides detailed information on material planning, floor plans and construction technology.

The readers are architects, constructors and people interested in architecture. They are educated, well-off and particularly interested in an upscale lifestyle - in art, culture, luxury accessories, wellness and more.
