

The guiding brand for interior design in The Netherlands

VTWONEN has been the leading multimedia living platform in the Netherlands and Belgium for 60 years. It's the place where everything comes together for creating your own personal living environment.

However, living is much more than chairs, paint, styling, and designer furniture. A house involves a mortgage, a special interior requires good insurance, and maybe it's time for those solar panels.

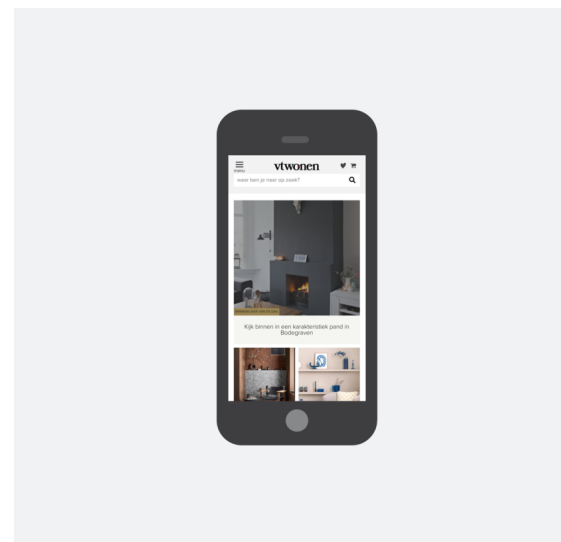

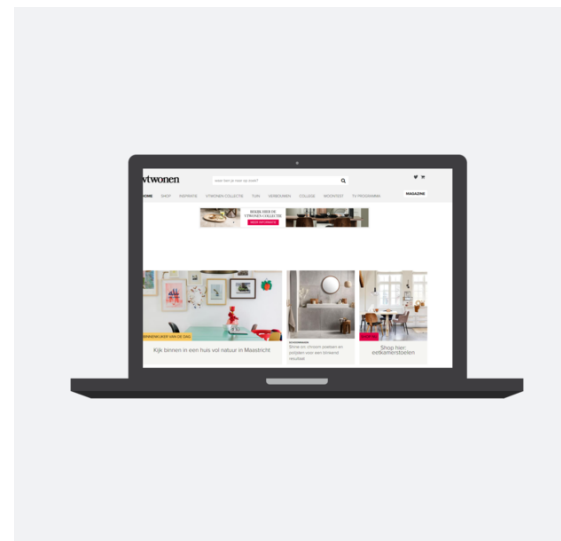

The majority of the readership is women aged between 25 and 55. They are well educated and affluent.
