

GEO EPOCHE

The history magazine from GEO

GEO EPOCHE provides stimulating reading material and serious background information about the latest research. Every issue is devoted to a single historical topic – epochs like the Middle Ages, nations like Prussia, world religions like Judaism. To breathe new life into the featured era, the magazine uses historical reconstructions, reportage, photographic essays, interviews, maps and info boxes designed to put key information at your fingertips. In addition, GEO EPOCHE tells stories about important people and dramatic events, about daily life and culture, politics, society and science.
