

GEO COLLECTION

Shows the world in the most beautiful pictures.

Shows the world in the most beautiful pictures

Photography has been one of the structural components of GEO's identity for almost 40 years. To further underline this strength in the eyes of the reader, there is GEO Collection. GEO COLLECTION is a magazine with 70% images and 30% texts. Both the format and the structure of the summary were designed in such a way that the commitment to photographic excellence becomes clear. The themes of this magazine have been chosen to reflect the other characteristics of GEO's identity: Articles, reports, in-depth interviews.
